

Campus placement app - Requirements

I. Student app

- A. Can register and log in -Done
- B. After registering they have to create a profile with basic personal details and educational details like current sem total cgpa, 12th and 10th, their resume and their area of interest-Done
- C. The student can also update their profile if any changes need to be made. These changes are verified by the dept coordinator and if the change is accurate the profile is updated and verified-Done
- D. After creating the profile and already registered students logging in will be shown the homepage-Done
- E. On the homepage, they will be shown any placement offers posted by TPO according to their department -Done
- F. It will also consist of offers which are posted on the internet using web scraping. These offers are filtered based on the interest of students and displayed (similar to a recommendation system) (this is only for those offers which are web scrapped)
- G. When an offer arrives, the students must get a notification
- H. Students can apply for any offers with an apply button. When the button is clicked, the details of the student like name, class, department and educational details and resume will be stored as a list
- I. The apply button will be disabled if the student does not match the company's eligibility criteria
- J. Another tab will consist of training materials uploaded by TPO
- K. Next tab consists of a chatbot which will answer FAQs like "can I apply for this job"
- L. The next tab will show the result of the student ie all the companies in which he has been placed

II. Admin(TPO) web portal

- A. They can log in and will be displayed on the home screen -DoneS
- B. They can enter the details of the incoming placement companies-Done
- C. There is an option to be clicked if the TPO does not want already placed students to not apply again. If the option is ticked, already placed students cannot apply for that offer
- D. They can generate the list of applied students for each company -Done
- E. They can upload any placement training materials
- F. They can upload and view the results sent by company

III. Dept coordinator web portal

- A. They can check the student profile and verify them

- B. If any student updates their profile the dept coordinator can check it and if accurate allow the updation and verify
- C. The dept coordinator also generates a result report which consists of department-wise results (name, class, company name), company-wise results (name, class, dept) and year-wise results (name, class, dept, company)
